University of Economics, Prague is reinforcing the cooperation with business

DAC - Developing and Advisory Centre is responsible for developing business partnerships, negotiating internships and working opportunities for students.

Prague 31st January 2007

The University of Economics, Prague has created the specialized Developing and Advisory Centre four months ago. The main objective is to promote the partnership with companies. In 2007 the Developing and Advisory Centre plans to start new important business partnerships, develop career consultancy and initiate systematic work with alumni.

In 2006 DAC organized for example “Day of Audit and Tax Consultancy“, which was held in partnership with Deloitte, Ernst & Young, KPMG and PricewaterhouseCoopers. The Centre also organized several business presentations at UEP, offered to students and graduates some free positions at different companies.

The centre improved considerably the fair for working opportunities “**Chance**” (Šance), which takes place at UEP twice a year. Last time 30 companies participated. They were from the field of consulting, banking, IT, FMCG, international business and production. Fair was visited by more than 1 300 students. Next fair will take place **on 21st March 2007** in atrium of Rajská budova.
